Introduction

The Referral Tree provides a single, central location for accessing referral letters and and forms across **North East London**.

The Referral Tree contains a comprehensive set of documents designed to support administrative staff and clinician in managing referrals and communication efficiently. These documents are organised by clinical specialty and function, making it easy to locate the appropriate referral forms.

All referral forms are:

- Maintained and updated in line with the North East London requirements
- Fully optimised to pull across patient data from patient records as well as from clinical templates designed to capture and embed crucial information to help speed up and streamline the referral process to save critical time.
- Standardised to support consistent and accurate referrals

Within the Referral Tree, you will find a wide range of referral forms, these are sourced and maintained in line with local pathways across North East London, ensuring consistency and compliance with current guidance.

This article provides an overview of the types of documents available within the Referral Tree and how they are structured, helping you quickly identify and use the most appropriate resource for your workflow. Use this support article is design to search for the referral forms and quickly locate the correct category if unsure.

❗ We do rely on local intelligence regarding certain services. If you have a more current version of a referral form, please [raise a support ticket](#) so we can update these for you.

When submitting forms: Please consider if the document you are sharing with us contains **ANY** patient identifiable data on it.

We cannot accept these documents and this is classed as a data breach.

What does it actually do?

This Protocol acts as a navigation hub for referral forms.

How it works:

1. Open a patient record
2. Launch the Referral Tree from one of our OneLaunchers or directly from F12
3. Select the relevant clinical category (e.g. Investigations, Community or Specialist, Urgent)
4. Choose the required referral form
5. Complete and save the letter

Each button links directly to a specific referral form, removing the need to manually search for documents.

As an example, we've used the Rugby Referral Tree and created a short video showing how to use the resource, see: [Using the Rugby Referral Tree](#).

What does it look like?

Multiple Choice Question

Welcome to the Primary Care IT Referral Tree for BHR (NEL).

****If you are loading the Referral Tree in a consultation and would like to include details from the consultation in the referral, you will need to save the consultation first, then load the Referral Tree after.****

Please select one of the following options:

PT00489

- [Admin \(Invites, Quality Alerts, etc\)](#)
- [End Of Life \(incl. Palliative care\)](#)
- [Individual Funding Request \(IFR\)](#)
- [Investigations, Screening, Imaging & Procedures](#)
- [Health & Wellbeing](#)
- [Mental Health, Autism and Learning Disabilities](#)
- [Paediatrics & Young People \(Audiology, Safeguarding, MH, ...\)](#)
- [Reproduction \(incl. Sexual Health\)](#)
- [Adult Safeguarding, Domestic Violence & Notifications](#)
- [Specialist & Community \(LTCs, COVID, etc\)](#)

List of all Categories & Referral Forms

The following list contains all the categories and forms found on our Referral tree as of 18/06/2026:

Use Ctrl + F to search for the referral form name

Certain forms may not be available in every area as this will depend on the service provider. If a form is marked with an ✓ for your area, you will be able to see this form on your Referral Tree.

How to get it

The Referral tree is accessible via our OneLaunchers, or directly from F12 **across all of North East London**

[Click here](#) for the support article which will provide details on how to add a protocol to your launcher list (each user will have to add it individually, as it isn't an organisation setting).

Fitting your practice

The Referral Tree is designed to support everyday administrative and clinical workflow by:

- Providing a standardised approach to referral
- Ensuring forms are up-to-date and ICB-aligned
- Supporting both clinical and non clinical staff

Practices can incorporate this into their workflow by using the referral tree as the default starting point for all referrals. to maximise its use within your practice:

- Ensure **secretarial and administrative staff** are aware of the Referral Tree
- Share this **support article** so staff understand how to locate and use referral forms
- Encourage use of the template as a **default starting point for all referrals**
